

Lashing for Excessive Over-width Cargo

- Transverse Spring Lashing

Corner Lashing Plate recommended

Lashing for Excessive Over-width Cargo

- Corner Lashing Plate

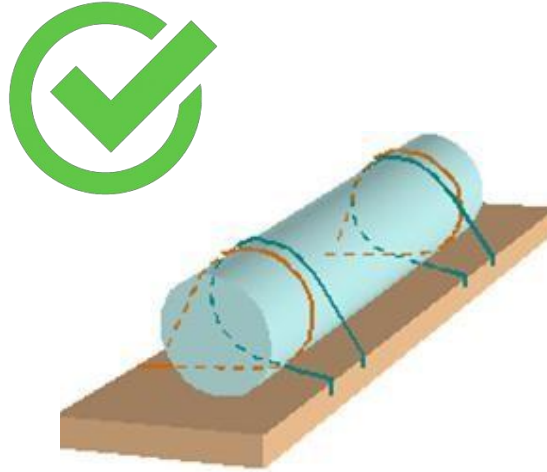

Advantages:

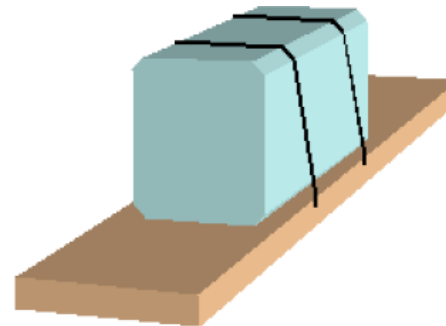

- creates additional top-over lashing effect in all directions.
- allows sideway securing of crate with direct cross lashings.
- allows forward/backward securing with direct cross lashings.

Lashing for Excessive Over-width Cargo

- Half-loop lashing

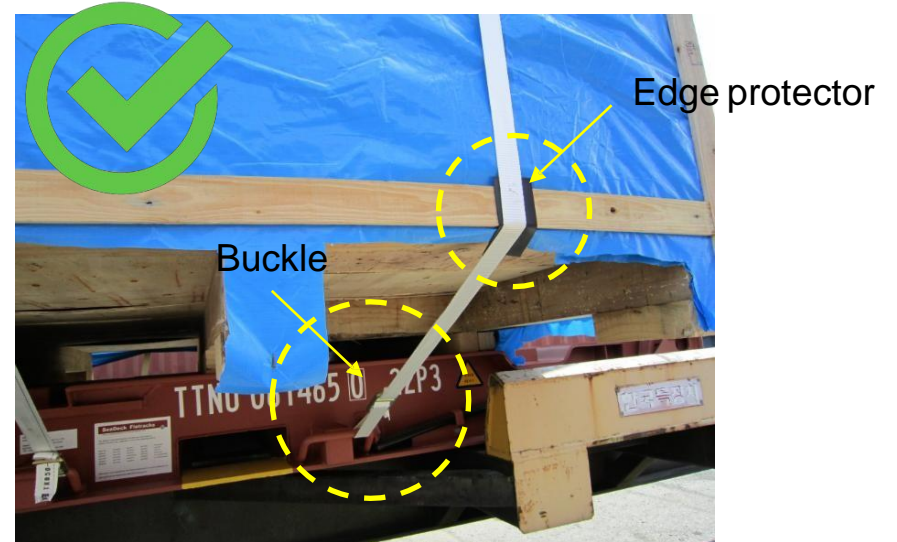

[Ex: Half-loop lashing]

[Ex: Top over lashing]

Best Practice

- Securing with Lashing Belt

Do not fasten web lashings by means of knots.
(it reduces their strength considerably)
